EDUCATION

Gandhi Institute of Engineering and Technology (GIET) University **Gunupur, Odisha**
B.Tech in Computer Science and Engineering, 2026 • CGPA: 7.36/10.0

EMMA International School of Fundamental Research **Balasore, Odisha**
+2 Science, 2022 • 67.00%

Dahamunda Nodal High School **Balasore, Odisha**
10th Standard, 2020 • 65.00%

PROJECTS

GuardianSOS — Real-time Personal Safety Web Application
MERN Stack, Geolocation API, WebSocket | *GitHub* | *Live Demo* | ***Dec 2025 – Apr 2026***

- Built a personal safety web app that sends real-time SOS alerts with live location tracking to registered emergency contacts.
- Implemented emergency-contact notifications and a community alert network so nearby users can respond to alerts during critical situations.
- Deployed the application to production on Render.

RedZone — Location-Based Emergency Alert System
MongoDB, Express.js, React, Node.js | *GitHub* | ***Jul 2025 – Nov 2025***

- Built a full-stack app where users report hazardous locations, reviewed through an admin approval workflow before alerts are broadcast.
- Integrated SMS and email notifications so all registered users are alerted instantly when a location is confirmed hazardous.

Fit Fusion — Online Fitness Platform
HTML, CSS, JavaScript, Node.js, Express.js, MongoDB | *GitHub* | ***Dec 2023 – Apr 2024***

- Built a fitness platform with workout plans, class schedules, progress tracking, and community engagement modules.
- Designed a fully responsive UI with intuitive navigation, usable by fitness enthusiasts of all levels.

AirCanvas — Virtual Writing Tool using Hand Gestures
Python, OpenCV, MediaPipe, NumPy | *GitHub* | ***Dec 2024 – Apr 2025***

- Built a virtual writing tool using MediaPipe for real-time hand tracking and OpenCV for image processing to capture and interpret hand movements.
- Eliminates the need for physical writing tools like pens or styluses.

Object Detection Tool
Python, OpenCV, Flask | *GitHub* | ***Jul 2024 – Nov 2024***

- Implemented a computer vision web app that identifies and locates objects within images, videos, and live webcam feeds.
- Used OpenCV's DNN module with a pre-trained SSD MobileNet v3 model; Flask serves the web UI with live streamed detection output.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML, CSS
Web Technologies: MongoDB, Express.js, React, Node.js, REST APIs, WebSocket
Libraries & Tools: OpenCV, MediaPipe, NumPy, Flask, Git, GitHub
Soft Skills: Communication, Leadership, Time Management, Teamwork, Problem Solving, Adaptability

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Shortlisted for Internal Hackathon 2023 — “Mr. Traveller” project
- Shortlisted for Internal Hackathon 2024 — Online Chatbot-based Ticketing System
